Build and package tool:	Maven, Gradle, NPM, Aptitude, PIP, DNF;
Test tool	Jmeter, SoapUI, Postman, Ready-API;
DevOps tool	Jenkins, Travis CI, Openshift, Kubernetes, Docker, Vagrant, VirtualBox, VMWare;
IDE	IntelliJ Idea, Eclipse, Maven, TortoiseHG, GIT

Education:

National Technical University of Ukraine Kiev Polytechnic Institute, NTUU KPI. (Kiev, Ukraine)

Languages:

English - upper-intermediate;

Ukrainian - fluent;

Russian - native;

Experience:

Java Developer – Playtech IMS (Jun 2017 - Present)

(Tapestry, JPA, Spring, Hibernate, SQL, Oracle, CSS, Guava, Java SE, JUnit, TestNG, Mockito)

- Full stack development
- Analyzing requirements and implementation of tasks
- Deployment the application
- Writing unit and integration tests for the application
- Development backend and frontend
- Database development
- Bug fixing

Senior Automation QA Engineer | Test lead – Playtech IMS (Aug 2015 - Jun 2017)

(Java, Selenium WD, Jmeter, SoapUI, Jenkins, TestNG report, Grafana)

- Develop and maintained test framework based on Java + Selenium WD + SoapUI
- Analyzing requirements and wrote test documentation
- Deployment the application
- Writing integration tests for the application
- Development backend and frontend tests
- Test planning
- Task delegation
- Performance testing with Jmeter

QA Manager - Cyber bionic systematics TestProvider.com (Jun 2015 – November 2015)

(ASP.NET, C#, Selenium WD, MS SQL Server 2012, Azure)

- Review of process development and performing test plans and test cases that are based on “Users stories” and “User experience”
- Collaborated with agile team of programmers
- Participated on meetings with customers to provide an information about QA activities that will be provided during the integration of different features to the system
- Found issues and reported with the best description and additional info
- Manage of activities test team after a new feature has been added
- Fixed problem on meetings with discussed main problems and defined followed tasks with team
- Supervised and guided newcomers
- Had a great experience in communication with foreign colleagues for solving some urgent problems and maintaining testing process as it is
- Management of 10 people test team

Senior QA Engineer | Configuration engineer– Wincor Nixdorf NAMOS (Apr 2014 - Aug 2015)

(C#, Selenium WD, bash, Java, Sikuli, QT C++, MS-SQL Server 03\08\12)

- Develop auto tests for desktop application on Java + Sikuli
- Analyzing requirements and wrote test documentation
- Deployment the application
- Testing on different configuration of hardware
- Development frontend tests with C# + Selenium WD for WEB UI part
- Configuration test stands and perform integration testing for device and platforms
- Made business trips to Germany test laboratory for electronic payments test and NAMOS compact testing;
- Setup full HOS-BOS-POS systems on a different hardware for tests in test laboratory;

- Had a great experience in communication with foreign colleagues for solving some urgent problems and maintaining testing process as it is;

Senior QA Engineer – BMS Consulting (Mar 2013 - Apr 2014)

(C#, Selenium WD, Java, SharePoint, PHP)

- Test planning
- Wrote test documentation
- GUI Testing
- Functional testing
- Develop automation test Java + Selenium WD
- Customer support

QA Engineer | Lottery network administrator – MSL MEGALOT, EVOBET (Oct 2012 - Mar 2013)

(Java, PHP, C++)

- Wrote test documentation
- Functional testing
- Develop automation test Java + Selenium WD

QA Engineer | Support engineer – Information Court System (Oct 2010 – Oct 2012)

(Delphi, Firebird)

- Manual testing; (Regression testing: re-testing of BUG, Functional testing, No-Functional testing)
- Bugs investigating, reporting and tracking
- Developing tests in Test Complete on C++
- Conducting and organizing of training seminars
- Participation in audits of specialized courts
- Analysis of user requirements
- Support of users
